## PCII PROGRAM AT A GLANCE

The Protected Critical Infrastructure Information (PCII) Program was created by Congress under the Critical Infrastructure Information Act of 2002 and implemented in 6 Code of Federal Regulations part 29. The Program encourages public and private sector owner(s) and operator(s) of physical and cyber critical infrastructure to voluntarily share sensitive security and proprietary data with CISA. The PCII Program protects information from federal, state, and local disclosure laws, allowing partners to securely share their critical infrastructure information. The PCII Program supports the U.S. Government's ability to understand and identify:

- Security risks and threats from physical and cyber-attacks
