

Mass Bomb Threats

Increasingly, bad actors are conducting strategic campaigns where multiple bomb threats sometimes simultaneously target infrastructure. Whether these mass bomb threats are made at multiple locations, or to one location over a length of time, **mass bomb threat campaigns can have significant impacts.**

INDICATORS

- Threats lack specificity and realism
- Often delivered via email, phone, or social media
- Phone threats are likely to have automated voices
- Media reports indicate similar and simultaneous threats

Cascading consequences and enhanced impact

Mass bomb threat campaigns target specific types of infrastructure on a national level such as:

Institutions of Higher Education Faith-Based Organizations

OPERATIONAL IMPACT

May halt activities, harm commerce, and drain resources

PSYCHOLOGICAL IMPACT

May disrupt lives, create fear, uncertainty, and panic

Each affected organization or facility should carefully evaluate the bomb threat

Consider the facts, context, and totality of the circumstances, then determine a response option.

Exact wording of the threat

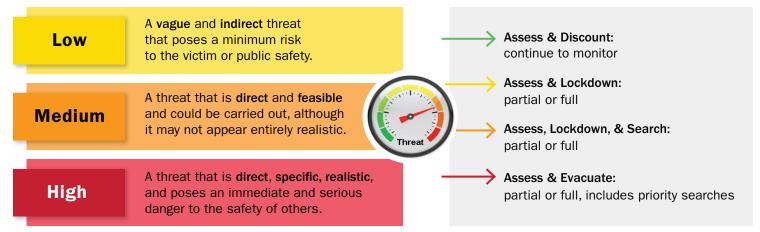

Prior threats against this or similar facilities

Current events regarding this or similar facilities

Accessibility of the site Occupants of the site

RISK LEVELS

THREAT RESPONSE OPTIONS

Every bomb threat requires professional judgment and should be handled in accordance with the facility's needs. Decision Maker(s) and administrators should periodically review Federal guidance and work with local first responders to establish a Bomb Threat Response Plan that addresses each risk level appropriately and is optimal for their building(s) and personnel.
