The Homemade Explosives (HME) and Precursor Awareness course provides participants with a foundational understanding of HME and common precursor materials. Participants will define HME, explore the considerations involved in a decision by perpetrators to use HME as the explosive for an attack, and will learn to identify common precursor chemicals and materials used to make HME.

Course Format and Audience
This 60-minute independent study training (IST) is a self-paced, web-based course covering the following topics:

- HME: an imminent danger
- Why would someone use HME?
- What should you look for?
- What to do if you suspect the presence of HME?
- What should I do if...?

This course is designed for public and private sector safety personnel and intended for audiences such as:

- Critical infrastructure owners and operators
- Public safety officers
- Emergency managers
- Security officers
- Law enforcement officials
- Private sector security professionals

Accreditation
The Cybersecurity and Infrastructure Security Agency’s (CISA) Office for Bombing Prevention (OBP) is accredited by the International Accreditors for Continuing Education and Training (IACET) to award Continuing Education Units (CEUs) for this course:

- International Accreditors for Continuing Education and Training (IACET) – .1 CEU
- Police Officer Standards and Training (POST), if approved by the student's state, may award 1 CEU
