# CISA Gateway Features

DEFEND TODAY,  
SECURE TOMORROW

## SURVEYS AND ASSESSMENTS

These non-regulatory surveys and assessments enable users to gather critical infrastructure data, including security, vulnerability, threat, and consequence information, that provide a complete context to meet users' mission-specific needs. This feature ranges from high-level surveys to comprehensive in-depth assessments to evaluate a facility's security and resilience posture.

## FACILITY DASHBOARDS

The dashboards provide owners and operators with snapshots of their facility's security and resilience posture and compare those results with those of similar facilities across the Nation. The information in the dashboards, derived from completed surveys and assessments, allows owners and operators to develop scenarios to explore potential future improvement options.

## SPECIAL EVENTS AND DOMESTIC INCIDENTS TRACKER

This powerful analysis tool uses the protection and resilience data from completed surveys and assessments to enhance steady state, special event, and domestic incident support capabilities. It enables users to make decisions regarding the impact of various emergencies and to prioritize their planning, protection, response, and recovery efforts.

## MAP VIEW

The Map View function enables users to drill down and view numerous data layers to specific States, counties, or cities. These layers include static layers, such as facilities-by-sector, daytime population, or street-view pictures, and dynamic layers, such as current wildfire or weather elements. These geographically accurate presentations provide users with an in-depth look at an area's operational situation.

## DIGITAL LIBRARY

The Digital Library is a single interface through which users can access a collection of critical infrastructure resources, policy documents, and security and resilience information. This information helps users enhance critical infrastructure protection programs, prepare for and respond to incidents, and research and analyze infrastructure security and resilience data specific to their mission needs.

## CONTACT US

Learn how the Cybersecurity and Infrastructure Security Agency (CISA) Gateway can support your organization's homeland security efforts by contacting the CISA Gateway Help Desk at [CISA-GatewayHelpDesk@cisa.dhs.gov](mailto:CISA-GatewayHelpDesk@cisa.dhs.gov) or 1-866-844-8163.
