About the Toolkit

GCA Cybersecurity Toolkit For Small Business

TOOLBOXES

1 Know What You Have

✓ Identify Your Devices 1.1

✓ Identify Your Applications 1.2

2 Update Your Defenses +

3 Beyond Simple Passwords +

4 Prevent Phishing and Malware +

STEP 1

Know What You Have

Start here. Use the tools below to take an inventory of your devices and accounts to know what items need to be secured.

Security Awareness Overview

Donated by **Wizer Security Awareness Training**

1.2 Identify Your Applications

Next, select "**Identify Your Applications**" under the Category menu, and choose any one of the tools listed to assist you in inventorying your applications.

Narrow your search by selecting your OS

Operating System

CIS Center for Internet Security®

TYPE | 1 LEVEL | 4h 0min TIME

CIS Hardware and Software Asset Tracker

Use this spreadsheet to track your hardware, software, and sensitive information.

View Tool ›

ManageEngine

TYPE | 2 LEVEL | 2h 0min TIME

Manage Engine Desktop Central

Use this tool to inventory and manage your computers, mobile devices and applications.
