

National Infrastructure Advisory Council (NIAC)
Executive Order 13636 and PPD-21 Working Group
Framing Questions on Cybersecurity Framework
August 20, 2013

- 1) What necessary elements must be in the Framework in order to facilitate broadest adoption by owners and operators?
- 2) What might be the most efficient and effective processes facilitating adoption; and what the government can do to facilitate?
- 3) What is the best way for the government to measure usefulness and adoption of the framework?
- 4) What are the obstacles that you see preventing adoption, particularly for those organizations beyond the Fortune 1000?
- 5) What do you recommend as the target audience (s) and the message to facilitate adoption?
- 6) What issues may exist requiring alignment across federal agencies, regulatory and non-regulatory, and with other levels of government; and what would you recommend addressing these issues?
