The Multi-Jurisdiction Improvised Explosive Device Security Planning (MJIEDSP) Program is a planning and assessment program managed by the Cybersecurity and Infrastructure Security Agency (CISA)’s Office for Bombing Prevention (OBP), consisting of a series of tabletop exercises that integrate counter-improvised explosive device (IED) capability analysis, training, and planning to enhance IED prevention, protection, mitigation, and response capabilities of participating jurisdictions. MJIEDSP assists participants in identifying roles, responsibilities, and capability gaps within a multi-jurisdictional planning area in alignment with the National Preparedness Goal for Countering IEDs.

The MJIEDSP Process
MJIEDSP workshops engage stakeholders in exercise-based planning and discussion of a cross-discipline, multi-agency, multi-jurisdictional response to a complex coordinated IED attack. Three sequentially scheduled events engage emergency and planning personnel of every level:

- **First Responder Workshop**: Assists the first responder community—including the private sector—in understanding and identifying the unique aspects of preparing for and responding to multiple, simultaneous IED incidents
- **Bomb Squad-Special Weapons and Tactic Teams (SWAT) Interoperability Workshop**: Focuses on tactical coordination between bomb squads and SWAT teams when responding to IED incidents involving active shooters and hostage situations
- **Executive Level Briefing**: Provides high-level decision makers with an overview of MJIEDSP efforts in their community, outlines the unique challenges associated with responding to IED incidents, and presents areas for improvement

MJIEDSP Produces Results By…
- Strengthening IED prevention, protection, mitigation, and response capabilities of participating communities
- Emphasizing National Incident Management System-compliant Mutual Aid Agreements related to IED response
- Providing an After-Action Report/Improvement Plan containing a list of identified counter-IED capability gaps, vulnerabilities, and recommended courses of action
- Aiding in grant request justifications and assisting communities with the development of IED-specific response plans
