

The President's National Security Telecommunications Advisory Committee

The President's National Security Telecommunications Advisory Committee (NSTAC) provides industry-based analyses and recommendations to the Executive Office of the President (EOP) on how the Government can enact policy for, or take actions to enhance, national security and emergency preparedness (NS/EP) telecommunications.

The NSTAC is composed of up to 30 Presidentially-appointed senior executives who represent various elements of the telecommunications industry. The committee advises the President on a wide range of issues related to telecommunications, information systems, information assurance, infrastructure protection, and other NS/EP concerns. The NSTAC meets quarterly to discuss its activities.

BACKGROUND

President Ronald Reagan created the NSTAC by Executive Order 12382, *President's National Security Telecommunications Advisory Committee*, in September 1982 to advise the President on matters regarding NS/EP telecommunications. Four issues preempted the establishment of the NSTAC: (1) the divestiture of AT&T, Inc.; (2) increased Government reliance on commercial communications; (3) potential impact of new technologies on NS/EP telecommunications; and (4) the growing importance of command, control, and communications to military and disaster response modernization.

NSTAC ACCOMPLISHMENTS

NSTAC activities are the genesis for many technical reports, recommendations to the President, and NS/EP operational programs. Since its inception, the NSTAC has examined various issues, including network resilience and convergence; commercial satellite survivability; cybersecurity; intrusion detection; emergency communications and interoperability; and information system, network, and wireless services security. The Government has acted on many of the NSTAC's recommendations, which have culminated in successes such as:

- **National Coordinating Center (NCC):** A Government-industry coordination center for day-to-day operational support to NS/EP telecommunications, the NCC was officially recognized as the Communications Sector Information Sharing and Analysis Center in January 2000. To enhance information sharing and collaborative efforts between communications and cybersecurity partners, the NCC was later integrated into the National Cybersecurity and Communications Integration Center (NCCIC), a 24-hour coordinated information sharing and incident response capability designed to protect and secure the Nation's cyber infrastructure. The NCCIC and NCC are now implemented as part of the Cybersecurity and Infrastructure Security Agency (CISA) Central hub, a portal that supports multi-directional information-sharing for federal, state, local, tribal, territorial, and private sector stakeholders.
- **Telecommunications Service Priority System:** The regulatory, administrative, and operational authority that enables priority provisioning and restoration of telecommunications services.
- **Network Security Information Exchanges:** Government and industry meet bi-monthly to address the threats posed to the public network when system vulnerabilities are exploited.
- **Securing Government Communications:** The NSTAC's recommendations on securing Government communications and the adoption of a cyber risk management posture have been implemented throughout the federal enterprise, earning recognition in DHS' 2014 *Joint National Priorities for Critical Infrastructure Security and Resilience*.
- **National Cyber Incident Response Plan:** The recommendations in the 2014 *NSTAC Report to the President on Information and Communications Technology (ICT) Mobilization*, particularly the NSTAC's definition of ICT functions, were influential in DHS' development of the *National Cyber Incident Response Plan* in 2016.

RECENT NSTAC ACTIVITIES

In February 2021, the NSTAC approved the *NSTAC Letter to the President on NS/EP Communications Priorities*. Addressed to the incoming Administration, the letter outlines the NSTAC's recent recommendations and future studies the NSTAC could pursue to advance the Nation's NS/EP priorities. In May 2020, the EOP tasked the NSTAC with a two-phase examination of the United States' communications resiliency posture. During phase I, the NSTAC studied the coronavirus (COVID-19) pandemic's impact on the Nation's ICT ecosystem. In October 2020, the NSTAC approved the *NSTAC Letter to the President on Communications Resiliency*, which included recommendations for improving the United States' NS/EP communications resiliency and economic security following the COVID-19 pandemic. In phase II, the NSTAC is assessing a variety of factors that will impact the Nation's NS/EP communications resiliency over the next 8 to 10 years. In August 2020, the NSTAC approved the *NSTAC Report to the President on Software-Defined Networking (SDN)*. In the report, the NSTAC offered policy recommendations on how to: (1) capitalize on best practices for deploying SDN across federal networks and critical infrastructure; (2) use SDN to address risks posed to its NS/EP communications networks and the ICT supply chain; and (3) identify methods to balance security and cost.

The President's National Security Telecommunications Advisory Committee

LEADERSHIP

The NSTAC Chair and Vice Chair are appointed by the President from current NSTAC membership. Mr. John Donovan, former Chief Executive Officer (CEO) of AT&T Communications, LLC, serves as the NSTAC Chair, and Mr. Scott Charney, Vice President for Security Policy, Microsoft Corporation, serves as the NSTAC Vice Chair. The NSTAC is supported by the Secretary of Homeland Security, who is the Executive Agent for the NSTAC. CISA and the NSTAC's Designated Federal Officer work closely with the EOP to coordinate the committee's daily operations.

NSTAC CHAIR

Mr. John Donovan
Former CEO
AT&T Communications, LLC

Dr. Joseph Fergus
Founder, President, and CEO
Communication Technologies, Inc.

Mr. Angel Ruiz
Chair of the Board
MediaKind, Inc

NSTAC VICE CHAIR

Mr. Scott Charney
Vice President for Security Policy
Microsoft Corp.

Mr. Patrick Gelsinger
CEO and Member of the Board
Intel Corp.

Mr. Stephen Schmidt
Chief Information Security Officer and Vice President of
Security Engineering
Amazon Web Services, Inc.

Mr. Peter Altabef
Chair and CEO
Unisys Corp.

Ms. Lisa Hook
Managing Partner
Two Island Partners, LLC

Ms. Kay Sears
Vice President and General Manager, Military Space
Lockheed Martin Corp.

Mr. William Brown
Chair and CEO
L3Harris Technologies, Inc.

Mr. Jack Huffard
Co-Founder and Member of the Board
Tenable Holdings, Inc.

Mr. Gary Smith
President and CEO
Ciena Corp.

Mr. Matthew Desch
CEO and Member of the Board
Iridium Communications, Inc.

Ms. Renée James
Founder, Chair, and CEO
Ampere Computing, LLC

Mr. Jeffrey Storey
President and CEO
Lumen Technologies, Inc.

Mr. David DeWalt
Founder and Managing Director
NightDragon Security, LLC

Dr. Thomas Kennedy
Executive Chair
Raytheon Technologies Corp.

Mr. Hock Tan
President, CEO, and Director
Broadcom, Inc.

Mr. Raymond Dolan
Chair and CEO
Cohere Technologies, Inc.

Mr. Mark McLaughlin
Vice Chair of the Board
Palo Alto Networks, Inc.

Mr. Christopher Young
Executive Vice President for Business Development
Microsoft Corp.
