

List of Federal Financial Assistance Programs Funding Emergency Communications

This list identifies federal financial assistance programs (i.e., grants, loans, cooperative agreements) that support emergency communications investments. Periodic updates will be posted on the [SAFECOM Funding website](#) as new programs are announced. Note that other opportunities may exist. Entities seeking funding should refer to the Federal Government website [Grants.gov](#) to determine if other opportunities are available. In addition, refer to the specific Notice of Funding Opportunity (NOFO), as this is a summary of program information related to emergency communications and does not reflect all program requirements.

Entities that are applying for federal financial assistance for emergency communications projects should reference the latest annual [SAFECOM Guidance on Emergency Communications Grants](#). The guidance provides general information on eligible activities, technical standards, and other terms and conditions that are common to most federal programs funding emergency communications. Note, recipients of the Federal Emergency Management Agency’s preparedness grants must comply with SAFECOM Guidance, as required in its Appendix D. Other federal programs encourage entities to follow SAFECOM Guidance recommendations and best practices, specifically its guidance to applicants on:

- Recommendations for planning, coordinating, and implementing emergency communications projects;
- Emergency communications activities that can be funded through federal grants;
- Overview of emergency communications systems and capabilities; and
- Technical standards that facilitate interoperability.
