

Protect Your Food Manufacturing Chemicals from Use in a Terrorist Attack

Food manufacturing facilities across the country produce and prepare fresh, frozen, canned and a variety of other foods for restaurants, grocery and convenience stores every day. To properly prepare the food and keep it refrigerated, food manufacturing facilities use a variety of chemicals throughout the manufacturing and distribution process. In the wrong hands, however, some of these chemicals can be used for great harm.

What Is CFATS?

In 2006, Congress authorized the U.S. Department of Homeland Security (DHS) to establish the Chemical Facility Anti-Terrorism Standards (CFATS) program. Managed by the Cybersecurity and Infrastructure Security Agency (CISA), the CFATS program identifies and regulates high-risk chemical facilities to ensure that they have security measures in place that reduce the risk of certain chemicals being weaponized.

Appendix A of the CFATS regulation lists more than 300 chemicals of interest (COI) and their respective screening threshold quantity (STQ), concentration, and security issues. If released, stolen or diverted, and/or used as a contaminant, these COI have the potential to cause significant loss of human life and/or health consequences. Any individual or facility in possession of COI that meets or exceeds the STQ must report their holdings to CISA through an online survey called a Top-Screen.

Collage (clockwise from top left): fish, variety of cheeses, variety of produce, and frozen food.

COI Commonly Found in Food Manufacturing Facilities

Food manufacturing facilities that use COI—e.g., dairy product manufacturing, meat packing, grain mills, sugar manufacturing, canning plants, bakeries, frozen food manufacturing, and cold storage facilities—are considered chemical facilities under CFATS and may be subject to its regulations. Some of the commonly reported COI include, but are not limited to:

- Ammonia (anhydrous)
- Ammonia (conc. of 20% or greater)
- Chlorine
- Hydrogen chloride (anhydrous)
- Hydrogen peroxide (conc. of at least 35%)
- Nitric acid
- Peracetic acid
- Phosphine
- Phosphorus oxychloride
- Potassium permanganate
- Propane
- Propylene oxide
- Sodium nitrate
- Sulfur dioxide (anhydrous)

If your facility possesses any COI at or above the STQ listed in Appendix A, you must submit a Top-Screen within 60 days of coming into possession of the COI. See 6 CFR § 27.210(a)(1)(i).

Review the Appendix A COI List at www.cisa.gov/publication/cfats-coi-list.

CFATS Exclusions

Certain facilities are excluded from the CFATS regulation by statute (6 USC § 621(4)) if they are:

- A Public Water System under the Safe Drinking Water Act
- A Treatment Works under the Federal Water Pollution Control Act
- Regulated by the U.S. Coast Guard under the Maritime Transportation Security Act (MTSA)
- Regulated by the Nuclear Regulatory Commission (NRC) or by a State with an NRC agreement
- Owned or operated by the Department of Defense or Energy

What's Next?

If your facility is not statutorily excluded from CFATS, your next steps are:

- Complete the Chemical-terrorism Vulnerability Information (CVI) Authorized User training to begin the process of reporting COI: www.cisa.gov/cvi-authorized-user-training
- Register for a Chemical Security Assessment Tool (CSAT) account to access the Top-Screen survey: <https://csat-registration.dhs.gov>
- Fill out a Top-Screen in CSAT to report your COI holdings to CISA.
- Based on the information provided, CISA assesses the overall risk of the facility.
- Facilities assessed as “high-risk” are required to submit a Security Vulnerability Assessment and security plan tailored to the unique security challenges and risks associated with their COI.

More than 150 CISA Chemical Security Inspectors are located nationwide to assist high-risk facilities identify and implement security measures that comply with the CFATS regulation.

Failure to Submit a Top-Screen

CISA has the authority to enforce compliance with the program. This can include issuing civil monetary penalties to facilities that fail to submit a Top-Screen or that are found to be in violation of any aspect of the CFATS regulations (6 USC § 624). Learn more at www.cisa.gov/cfats-enforcement.
