

DEFEND TODAY, SECURE TOMORROW

CAREERS AT CISA: CAPACITY BUILDING ACQUISITION AND BUDGET

OVERVIEW

The Cybersecurity and Infrastructure Security Agency (CISA) leads the national effort to defend critical infrastructure against the threats of today, while working with partners across all levels of government and in the private sector to secure against the evolving risks of tomorrow. CISA's Capacity Building (CB) function enables its customers to manage cybersecurity risk by building their capacity to implement effective cybersecurity policies, tools, and procedures. CB helps stakeholders better manage cybersecurity risk by defining expectations for stakeholder cybersecurity, leading implementation and enforcement of cybersecurity requirements, managing CISA's cybersecurity services portfolio, building capacity, and enhancing collective defense and readiness.

ACQUISITION AND BUDGET BRANCH

CB's Acquisition and Budget (AB) branch plays a key role in the CB mission. CB AB's mission is to support and improve CB programs and customer agencies by providing full lifecycle acquisition and budget support. CB AB project managers and budget subject matter experts (SMEs) are embedded in cybersecurity programs to lead management and execution of budgets, contract requirements/strategy, and industry engagement; establish innovative government-wide acquisition solutions; and foster ongoing partnership and collaboration with industry partners and customer agencies to lead and deliver complex, large-scale cybersecurity tools and services, budget, and project management activities on behalf of CB.

The CB AB branch works with stakeholders to gather requirements and develop, manage, and oversee unique and complex acquisition strategies on cybersecurity capabilities to provide commercial offerings to the federal enterprise as well as state, local, tribal, and territorial (SLTT) entities. In addition, CB AB provides pre- and post-award contract management; manages and executes tool procurement/maintenance activities; manages vendor relationships and industry communications; performs financial management and budget formulation, execution, and cost activities; enhances stakeholder engagement; manages contractor workforce and security status; and coordinates training and supply requests.

The AB branch manages cybersecurity strategic planning, mission support, and acquisition and budget expertise for all CB branches, including but not limited to the following programs and initiatives:

- Cybersecurity capability implementation, such as the Continuous Diagnostics and Mitigation (CDM) Program
- Cybersecurity shared services offerings, including a Vulnerability Disclosure Policy (VDP) platform, protective Domain Name System (pDNS) resolver services, and .gov top-level domain oversight
- Cybersecurity oversight and enablement initiatives, such as the High Value Asset Program, the Federal Enterprise Improvement Team (FEIT), and Federal Cybersecurity Supply Chain Risk Management
- Cybersecurity education and training efforts

CB AB manages a \$6+ billion contract portfolio that supports over 3,000 contractors.

CAREER OPPORTUNITIES

CB AB is seeking highly qualified professionals to fill mid- and senior-level positions. CB AB staff serve as advisors within the CB subdivision and provide procurement and budget advice, guidance, and assistance to the organization. Acquisition staff develop innovative short- and long-term acquisition strategies and help build shared services programs to support the entire federal enterprise and SLTT entities. Additionally, staff in this branch are responsible for planning, organizing, and carrying out major, substantive budgets for significant IT program components.

Section	Job Responsibilities	Open Positions
Post-Award Contract and COR Management	<ul style="list-style-type: none"> ▪ Provide project management expertise and leadership as non-transactional Contracting Officer’s Representatives (CORs) in support of all contract management efforts. ▪ Lead management of contract execution while working closely with multiple stakeholders, such as program directors, contractor teams, industry partners, contracting professionals, and agency contacts, to provide procurement guidance and ensure successful mission execution, with on-time delivery of high-quality solutions. ▪ Initiate and execute contract modifications by developing procurement packages and seeing them through to award. ▪ Manage, track, and oversee contractor performance through enhanced processes, templates, and contract criteria. ▪ Ensure sound financial management and track cost savings. ▪ Maintain proficiency in federal contracting laws/regulations and processes. ▪ Provide government oversight, review, and approval of contract deliverables, and ensure contract payments are made in a timely, proper manner. 	<ul style="list-style-type: none"> ▪ CDM DEFEND CORs ▪ CORs ▪ Junior Budget Analyst <p>GS 11/12/13/14</p>
